

Burhani Pack Vac Leak Detector

Vacuum Leak detector machine manufactured by Burhani Hardware used for Package Leak Detector and Seal Tester in application such as Package Manufacturers, Sea packaged food, meat packaged food, cheese, Pet Food, Medical pouches, Pharmaceutical pouch, cosmetic, Dairy products, Cereal and Grains, Bakery Products, snack food, coffee and tea, confectionary and other related products.

What is vacuum leak detector

Pack-Vac Leak Detectors Leak Testers

Pack-Vac Leak Detectors from Burhani Hardware And Fittings for Quality Control

Burhani Pack-Vac Leak Detectors assist you guarantee to your customers that your packaging system is dependable once it leaves your facility.

Sealing time, packing material compatibility, seal reliability in high altitude trucking and airfreight are some of the production variables that has to be taken into account since the manufacturing possibilities are countless.

Leak Test Video

Burhani pack-vac leak detectors allow you to set up reliable package line quickly without efforts. This is a systematic package testing system. This results in accurate adjustment of machinery and less downtime. Continues usage of Burhani Pack-Vac leak Detectors can detect sealing problems before they snowball. By this way, the production yield is improved. Hence Burhani Pack-Vac leak detectors can diagnose the defects before reaching customer. A Touch Screen PLC can be added to the system to stimulate High altitude and vacuum levels for ideal situations.

Operation

Burhani Pack-vac leak detectors can perform vacuum test in less than 10 to 30 seconds. The Unit is partly filled with water for vacuum leakage test. The burst test can be done dry. Drop your sealed package inside the chamber, close the lid and engage the vacuum lever. Watch for bubbles in case of leakage.

The Burhani Pack-Vac Leak Detectors is used to perform a variety of ASTM test methods for detecting leaks and seal integrity.

ASTM D6653 Standard Test Methods for Determining the Effects of High Altitude on Packaging Systems by Vacuum Method

ASTM D3078 Standard Test Method for Determination of Leaks in Flexible Packaging by Bubble Emission

ASTM D4991 Standard Test Method for Leakage Testing of Empty Rigid Containers by Vacuum Method

ASTM D4169 Standard Practice for Performance Testing of Shipping Containers and Systems

ASTM F2096 Standard Test Method for Detecting Gross Leaks in Packaging by Internal Pressurization (Bubble Test) – Using our optional adapter

ASTM D5094 Standard Test Methods for Gross Leakage of Liquids from Containers with Threaded or Lug-Style Closures

Choosing the Right Burhani Pack-Vac Leak Detector

Now that you know you need one of our Pack-Vac Leak Detectors, here's how to find the right one for your application.

Connection Requirements

we recommend the Electric Vacuum Pump. Our electric model comes equipped with a quiet and durable vacuum pump, 230/115 VAC standard(unless otherwise specified).

Size

Burhani Hardware can craft custom size vacuum chambers. Also Burhani Pack-Vac Leak Detectors are available in eight production models. You can choose from any one or custom make according to your requirements. We can also help our customers to select size based on their packages. with our innovative machining centres we offer high quality and affordable prices for burhani pack vac leak detector.

Burhani Pack Vac Leak Detector

Clear Chamber – Cube

Model No	Capacity Gallon	Capacity Litres	Size Inches
BHFGCB080606	1.2	4.5	8x6x6
BHFGCB110808	3	12	11x8x8
BHFGCB181210	10	36	18x12x10
BHFGCB201413	16	60	20x14x13
BHFGCB242015	31	118	24x20x15
BHFGCB302016	41	157	30x20x16
BHFGCB322620	72	272	32x26x20
Custom sizes available on Demand			

Clear Chamber – Cylindrical

Model No	Capacity Gallon	Capacity Litres	Size Dia x Height (cm)
BHFGC1060	0.5	1.9	10x60
BHFGC2060	2.0	7.5	20x60
BHFGC2560	3.1	11.8	25x60
BHFGC3060	4.5	17.0	30x60
BHFGC3560	6.0	23.0	35x60
BHFGC4060	8.0	30.0	40x60
BHFGC4560	10.0	38.0	45x60
BHFGC5060	13.0	47.0	50x60
Custom Sizes Manufactured on Demand
